Proposed Schedule for NPIRS Workload and User Pop Reports

Sept 4-7 (now):

Regular monthly year-to-date production of FY98-01 Workload report on NPIRS web site.

Regular monthly production of FY99-01 User Pops report on NPIRS web site. (The monthly report will calculate the User Pop based on a set date noted in the report, e.g. middle of previous month.)

1st Week of Oct:

Final FY98-00 Workload reports on NPIRS web site.

Final FY99-00 User Pop reports on NPIRS web site.

FY98 User Pop reports _on DQAT site only_.

Continue regular monthly year-to-date production of FY01 Workload report on NPIRS web site.

Continue regular monthly production of FY01 User Pops report on NPIRS web site.

1st Week of Nov:

Continue regular monthly year-to-date production of FY01 Workload report on NPIRS web site.

Continue regular monthly production of FY01 User Pops report on NPIRS web site.

Begin regular monthly year-to-date production of FY02 Workload report on NPIRS web site.

Begin regular monthly production of FY02 User Pops report on NPIRS web site.

1st Week of Dec:

Continue regular monthly year-to-date production of FY01-02 Workload reports on NPIRS web site.

Continue regular monthly production of FY01-02 User Pops reports on NPIRS web site.

1st Week of Jan:

Final FY01 Workload report on the NPIRS web site.

After Area by Area approval of Workloads, post Final FY01 User Pop report, using new Vality unduplication method, on NPIRS web site. It is anticipated this may begin as soon as 5 working days after workload posting.

Continue regular monthly year-to-date production of FY02 Workload report on NPIRS web site.

Continue regular monthly production of FY02 User Pops report on NPIRS web site.

1st Week of Feb:

Continue regular monthly year-to-date production of FY02 Workload report on NPIRS web site.

Continue regular monthly production of FY02 User Pops report on NPIRS web site.

We cannot yet determine when and how we should shift to the new reloaded registration data. We will table this decision for a month or two until we have more information. Options include:

1. _Report numbers with whatever registration data we have (some old, some new)._
2. _Maintain two separate systems and shift from the old to the new at some fixed point (we may not have the space/budget to allow us to do this)_
3. _Hold on monthly production for the 3-4 months reload period, then resume with new data._
